

LOGICAL MODEL : BOOKSTORE

Customer	
int (PK)	customer_id
string	first_name
string	last_name
string	email
string	phone
date	date_created

EMPLOYEE	
int	employee_id (PK)
str.	first_name
STR.	last_name
str.	email
STR.	phone
str.	employment_status
	job_title

Customer_address	
int	customer_id (PK)
string	address_street
string	city
string	province/state
string	postal code/zipcode
string	COUNTRY
datetime	updated_last

1 to 1 relationship

TYPE 1 ^{over-}write

SALES	
int	sales_id (PK)
int	ORDER_ID
int	BOOK_ID
int	SALE_DATE
int	QUANTITY
decimal	discount
decimal	Price (unit)

EMPLOYEE_SHIFT	
int	SHIFT_ID (PK)
int	EMPLOYEE_ID
int	SHIFT_DATE
string	SHIFT_TYPE (am, vs, eve)
time	START_TIME
time	END_TIME

DATE_DIMENSION	
date	date (PK)
int	day_of_week
string	day_name
int	day_of_month
int	week_of_year
int	month_number
string	month_name
boolean	is_holiday
string	fiscal_period

ORDER	
int	ORDER_ID (PK)
int	CUSTOMER_ID
int	EMPLOYEE_ID
int	ORDER_DATE
str.	order_status
int	order_date
string	payment_method
decimal	order_total

BOOK	
int	BOOK_ID (PK)
string	ISBN
string	TITLE
string	author
string	published
date	publication_date
	list_price
	cost
	is_available
	genre
